

## Group Assignment

This course includes a group assignment worth **25%** of the total assessment, emphasizing the practical application of course concepts. This assignment provides an opportunity for you to learn from one another and actively participate in each other's learning. Additionally, it helps you develop skills valued by employers, such as problem-solving, negotiation, conflict resolution, leadership, critical thinking, and time management.

Effective teamwork is crucial, and this course offers a chance to develop these skills through group work as part of the assessment tasks. The assignment will be evaluated based on technical accuracy, practical application, writing quality, and overall presentation.

Groups are required to select their own topics and **propose an effective regression model for a real-world problem of interest, using real-world data.**

The group assignment is due on **Monday, November 4, 2024, by 6:00 PM (18:00).**

It must be submitted both electronically on the course website and as a hard copy with a cover page to the course instructor. The submission will be considered complete only when both versions are submitted; otherwise, a late submission penalty will apply.
